

401-D2 MASTER UNIT

Mount Kelvin 401-D2 Master Unit (MU) connects the 401-D2 room control units to the Mount Kelvin cloud. Cloud connection enables monitoring the system and changing the configurations remotely.

The master unit transforms commands sent from Fleet Manager or API integrations into DALI commands, and forwards these to selected room control kits. Only a single master unit is required per building.

SPECIFICATIONS

DIMENSIONS (LxWxH):	90,5 x 71,3 x 62,0 mm
MOUNTING:	DIN rail
CASE MATERIAL:	UL94V-0 Self Extinguishing PPO and PC Material
STORAGE:	Micro SD
INPUT POWER:	5V/2.5A DC
OPERATING TEMPERATURE:	0-50°C
CONNECTIVITY:	401-D2 room control units / Mount Kelvin cloud via Ethernet
